Topics in this presentation.

- ❖ Update on funder ORCID adoption in ProposalCentral
- ❖ Examples of ORCID integration in the funding workflow
- ❖ Steps every funder can take right now - ORCID member or not

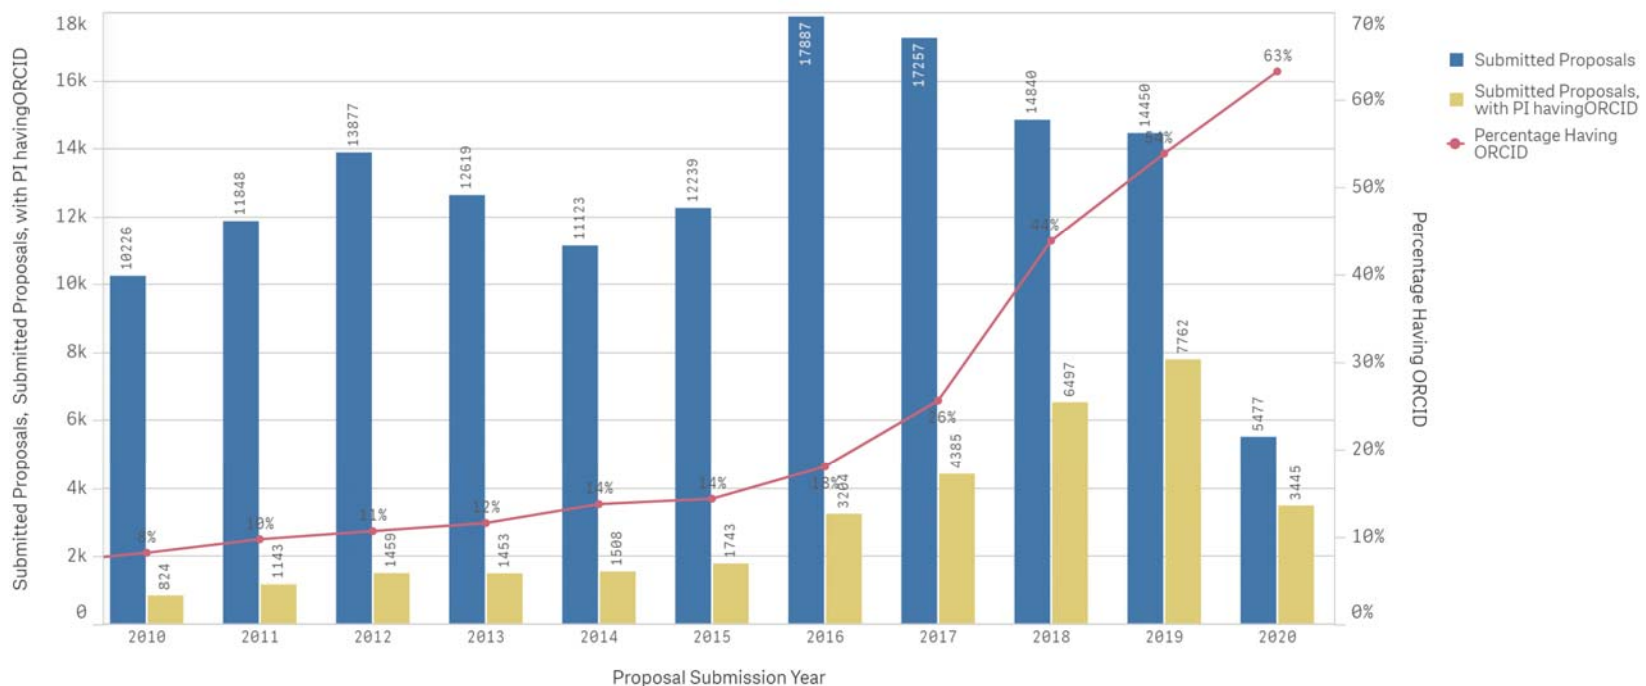

ORCID is a powerful enabler for researchers who interact with many funders on ProposalCentral.

For funders, the first step is getting the persistent *connection* to the researcher: this is more than the ID.

46 funders *require* ORCID iDs in ProposalCentral applications.

63% of applicants in 2020 *connected their ORCID iD.*

The ORCID connection is integrated in four main areas of ProposalCentral.

Connect

Researchers connect their ORCID record to ProposalCentral and to funders individually (if the funder is an ORCID member):

- New Account
- Profile
- Applications
- Pre-award or Award Task
- Progress Reports
- Review Committee

Profile

Researchers profiles in ProposalCentral are populated with institution affiliations, degrees, publications, and funding from their ORCID record:

- Initiated by researcher
- Automatically by ProposalCentral (coming summer 2020)

Applications and Progress Reports

Researchers report publications and funded projects in progress reports and applications by selecting data populated from their ORCID record - re-using, not re-entering.

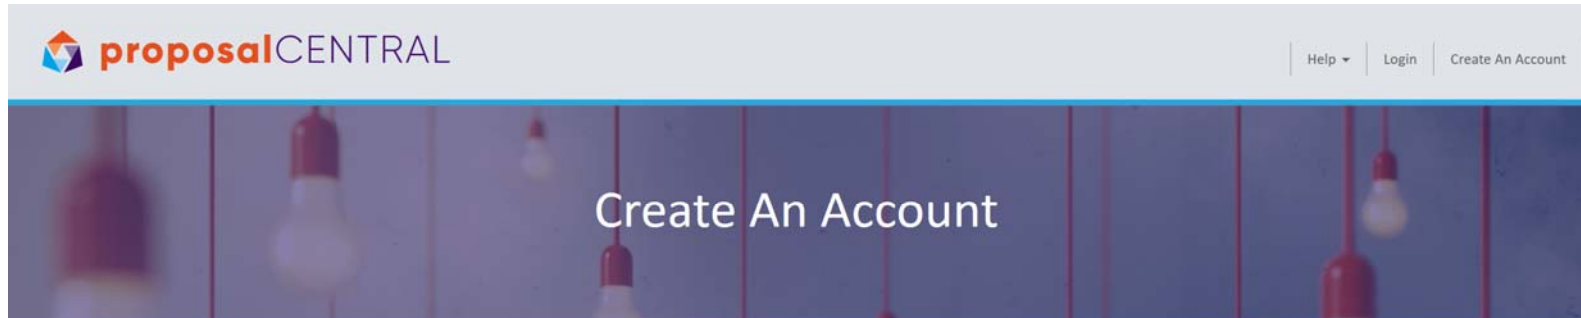

Funders Update ORCID

Funders update researchers' ORCID records with funded awards or reviewer services, providing a trusted assertion for others and automating maintenance for researchers.

- Award funding
- Reviewer service (coming fall 2020)

Connect when registering a new user account.

 Create Account using your ORCID iD

• Username:

Please create a username for this account. Your username and/or email address, in combination with the password created below, allow you to access your ProposalCentral account.

• First Name:

Please enter your first name

• Last Name:

Researchers can create a new account in ProposalCentral using their ORCID record – creating the connection at the start.

Connect from their profile.

The screenshot shows the 'proposalCENTRAL' interface. The top navigation bar includes 'Subscriptions', 'Help', 'McKee, James - Logout', and 'Admin'. Below this is a secondary navigation bar with 'Institution Home', 'Proposals', 'Awards', 'Professional Profile', 'Institution Profile', and 'Grant Opportunities'. A 'pCdrive' logo is on the right. Under 'Professional Profile', there are links for 'My Profile', 'Other Profiles', 'Add Profile', and 'Combine Profiles'. A red box highlights the 'Create or Connect your ORCID ID' link, with a red arrow pointing to it. The main content area is titled 'Contents of Professional Profile' and includes a 'Help' button. It lists three sections: '1 Institution & Contact Info' (with a blue button for 'Altum, Inc.' and an 'Add' button), '2 Degrees', and '3 Research Interests' (with a 'General Interests' section containing 'Alliance For Cancer Gene Therapy Keywords'). A light blue informational box states: 'You can begin working on a proposal by clicking on the Create New Proposal link. We suggest that at a minimum you complete the contact information below. You do not need to complete the other sections of your profile. However, if a grantmaker requires additional information on a program for which you are submitting an application, you will have to return to your profile to complete their required sections.' A 'Create New Proposal' button is in the top right of this box. Below this is a form for account information: 'Name: McKee, James', 'Email: jamie.mckee@altum.com', and an 'Edit Account Information' button. The form has 'Save', 'Cancel', 'Next>>', and 'Delete This Contact Item' buttons. It includes fields for 'Institution: Altum, Inc.' (with a 'Change Institution' button and a 'Primary Institution' checkbox), 'Institution Abbreviation:', and 'Position Title: Director, Business Development'.

Researchers who are existing users can connect their ORCID from their profile (and load their ORCID data to their profile).

Connect while completing an application.

Researchers can connect or get a new ORCID account directly in an application.

The screenshot displays the American Heart Association application portal. On the left, a sidebar lists 'LOI Sections' and 'Proposal Sections'. The 'Applicant/PI' section is selected. The main content area shows the 'Applicant/PI' section with a navigation bar (Save, Print, Cancel, Exit) and a dropdown menu for 'PI Select' (McKee, Jamie - ABC Research Institution). Below this, there is a table of member information and a highlighted link to connect an ORCID ID.

Proposal To: American Heart Association
Program: Collaborative Sciences Award
Title (Applicant): This is my test application using fixed dates and readability (McKee, Jamie)
Deadline: 11/30/2020 11:59:59 AM (U.S. Eastern Time)

Applicant/PI

<<Previous Next>> Save Print Cancel Exit

Person who initially creates the LOI or proposal is pre-loaded as the PI. Contact information from PI's profile shown below. To update profile, click Edit Profile. To change PI, select from list and **click button to confirm selection.**

PI Select: McKee, Jamie - ABC Research Institution

Edit Professional Profile

AHA Member ID:	ID	Expiration Date	Status
*	253452345	1/1/2019	Expired Renew/Update Membership

* ORCID ID: You have not linked your ORCID ID to **proposalCENTRAL**. [Click here to Create or Connect your ORCID ID](#)

* ORCID Authorization: You have not authorized American Heart Association to add awards to your ORCID profile. [Click here to Authorize](#)

Connect while completing a progress report (or an award or pre-award task).

If awardees didn't connect their ORCID record during the application, they can connect or get a new ORCID account directly in a progress report or in a specialized task you set up for awardees.

The screenshot shows the proposalCENTRAL interface. At the top, there is a header with the logo and the text "proposalCENTRAL" and a user profile "McKee, Jamie (Admin) - Logout". Below the header is a navigation bar with a "Home" button. The main content area displays award details for "McKee, Jamie" at "ABC Research Institution". The award ID is "108549", the program is "Young Investigator Award", and the project title is "ORCID testing". The award start and end dates are "5/1/2020 - 5/31/2020". The award amount is "\$0.00", and the amounts paid and spent are also "\$0.00". Progress bars show 16% completion for the award, and 0% for paid and spent amounts. Below the progress bars is a text area for describing the project's accomplishments, with a note "(Do not exceed 5000 characters, including spaces)". There is also a section for publications, with a checkbox for "No Publications to report" and a table with columns for Citation Year, Status, PMID, Title, Journal, Source, and Action. At the bottom, there is an "ORCID Authorization" section with a message: "Children's Tumor Foundation is not authorized to add funding records to the ORCID profile." and a button labeled "Click Here to Authorize" with a red arrow pointing to it.

Grantee	McKee, Jamie	Award ID	108549

Researcher sees award in their ORCID record with source (Funder, if member, or ProposalCentral).

The screenshot displays the ORCID profile of John O'Bryan. The profile includes the ORCID ID <https://orcid.org/0000-0001-5386-1080> and a 'Print view' link. The 'Funding' section is expanded to show two categories: 'Funding (2)' and 'Funding (3)'. The 'Funding (2)' section lists two grants from St. Baldrick's Foundation (Monrovia) with grant numbers 207846 and 137867, both with 'Source: ProposalCentral'. The 'Funding (3)' section lists two grants from Zee Test Grant Maker (Unspecified City) with grant number 733509, both with 'Source: Children's Tumor Foundation'. Red arrows point to the source information for the two grants in the 'Funding (3)' section. A 'Help' button is visible in the bottom right corner of the funding section.

darryl test 7 Help

Having the ORCID *iD* solves *Name Ambiguity* across systems (e.g., funders, publishers, institutions).

Of the more than 6 million authors in a major journal citations and abstracts database, more than two-thirds of them share a last name and single initial with another author, and an ambiguous name in the same database refers on average to eight people.

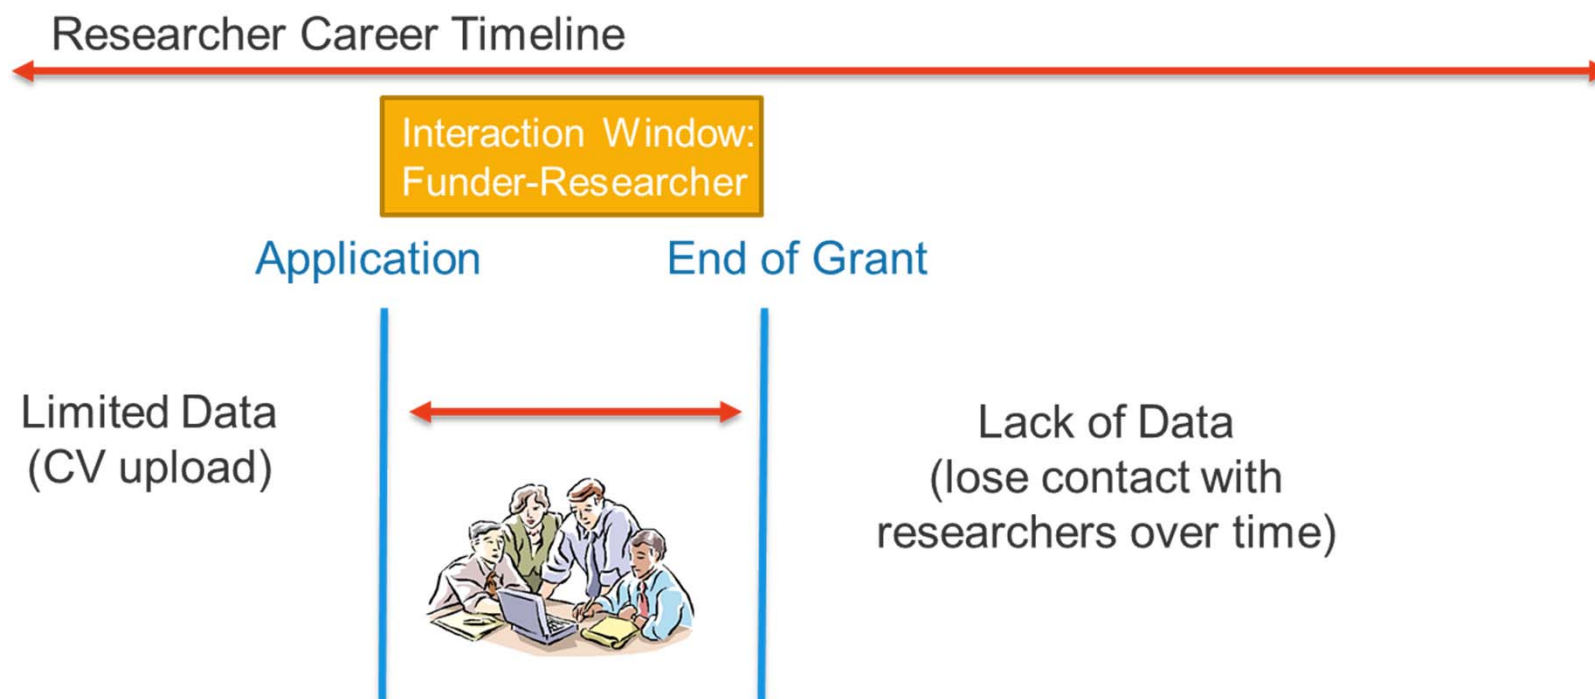

Ted Hart @DistribEcology

31s

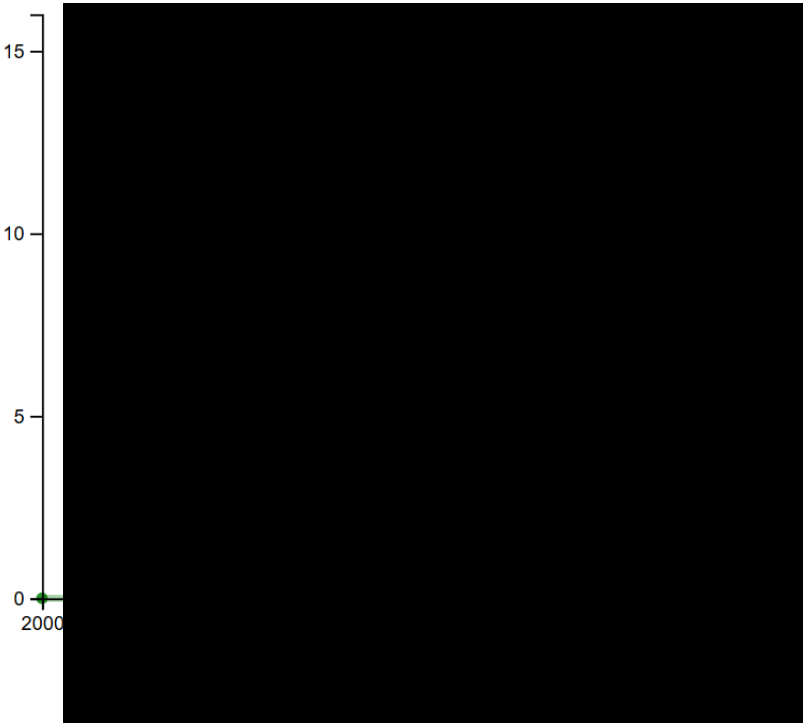

An easy case for just using an ORCID as my name is T. Hart, E. Hart and E. M. Hart on publications I've discovered.

The ORCID *connection* enables funders to answer a common question, “What did researchers accomplish after our grant?”

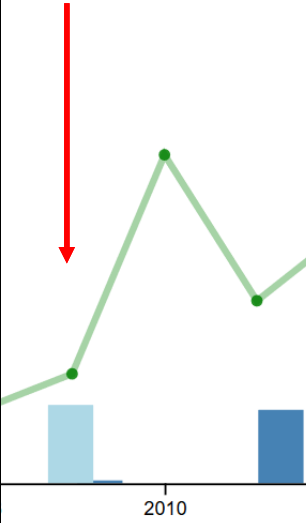

The persistent ORCID *connection* makes the researcher's career visible beyond the grant.

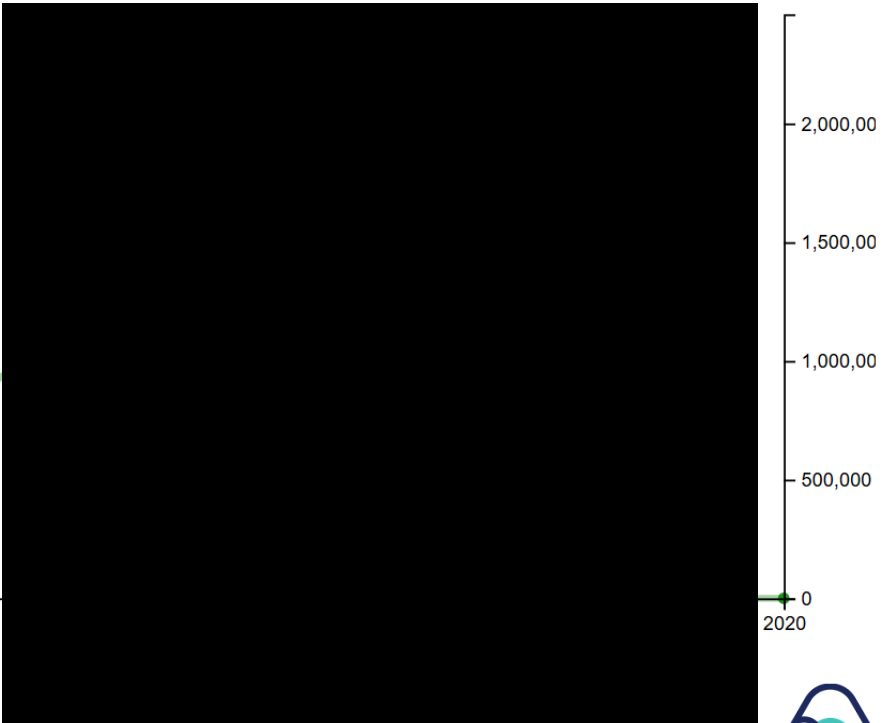

Publications

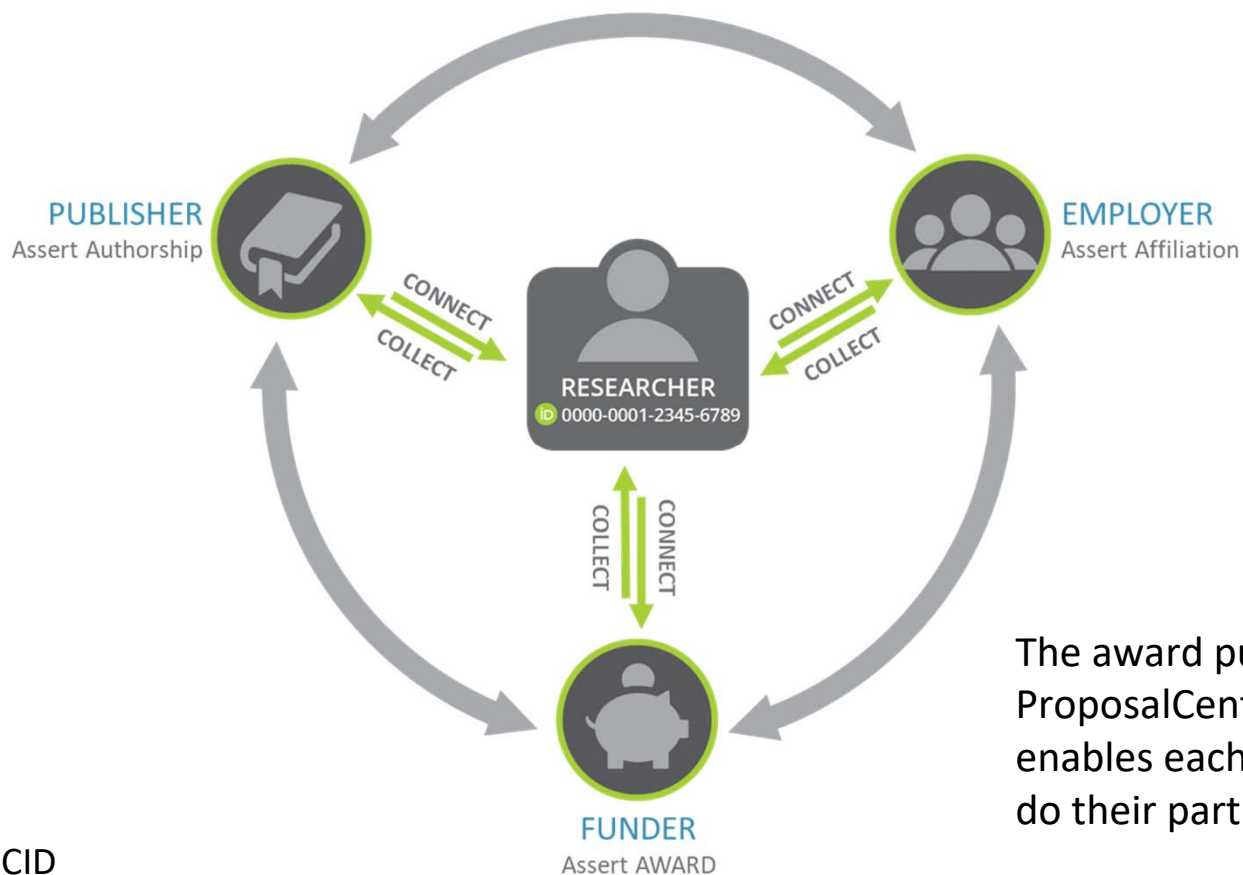

Funder's Grant to Researcher

Funding

***Automated Content* is the key to sustainability, and each funder, publisher, and institution has a role and responsibility.**

The award push in ProposalCentral enables each funder to do their part.

Biography

David H. Gutmann received his undergraduate, graduate (PhD) and medical (MD) degrees from the University of Michigan, where he trained in immunogenetics in the laboratory of Dr. John Niederhuber. During his residency in Neurology at the University of Pennsylvania, he had the good fortune of working with Dr. Kenneth Fischbeck who sparked his interest in neurogenetics. He then returned to the University of Michigan for research fellowship training in Human Genetics with Dr. Francis Collins. During this time, he identified the neurofibromatosis type 1 (NF1) protein and began to elucidate its function as a RAS regulator. In late 1993, he was recruited to Washington University, becoming a full professor in 2001 and the Donald O. Schnuck Family Professor in 2002. He established the St. Louis Children's Hospital Neurofibromatosis Clinical Program in 1994 and the Washington University Neurofibromatosis Center in 2004. His laboratory is currently focused on understanding the genomic, molecular and cellular basis for nervous system problems affecting children and adults with NF1 using both human biospecimens and novel genetically-engineered mouse strains. Over the past 20 years, his team has developed numerous mouse models of NF1-associated optic glioma, somatic growth defects, attention deficit, autism, plexiform neurofibroma, and spatial learning impairments as well as NF2-associated meningioma. They have used these preclinical models to define the cellular origins of tumors, the contribution of the tumor microenvironment, and the major growth control pathways that dictate brain development in NF. He has published over 400 peer-reviewed manuscripts, and has been recognized for his achievements with numerous awards, including the 2012 Children's Tumor Foundation Frederich von Recklinghausen Lifetime Achievement Award, the 2013 Washington University Distinguished Faculty Research Award, the 2014 Riley Church Lectureship and the 2017 Alexander von Humboldt Award. He also serves as a member of the National Institute of Neurological Disorders and Stroke Advisory Council.

ProposalCentral provides a visualization of this content for each awardee's career outputs....

...which can be aggregated to assess a program(s) impact on the careers of a group of funded researchers.

5 steps every funder can take now...

- 1. Get the ORCID connection early... in applications.** Requiring ORCID in applications is not a burden for applicants. Ask to have this turned on.
- 2. Ask awardees to verify or add their connection.** In ProposalCentral, this can be a one-time task (all awardees) or an automated deliverable assigned to new awardees or part of a regular task like a progress report. Let us help you set this up.
- 3. Ask awardees to update their ORCID content.** Once will not be enough.
 - ❖ Communicate the why (<https://youtu.be/G2GI0rVq-Jg>)
 - ❖ Show value for the researcher by using the ORCID content to simplify the process i.e., selecting publications and follow-on funding in progress reports.
 - ❖ Let researchers know about the simple tools they can use to load content quickly and automate content (ORCID Wizards)
- 4. Collaborate with research offices at your funded institutions** to help them (and their librarians) to sell adoption of ORCID in institution systems. This multiplies the benefits for researchers.
- 5. Add ORCID integration to your own journals.** Many funders have one or more publications. Most vendor publication platforms have ORCID available – but you have to ask for it to be turned on.

Incentives for researchers to use ORCID.

Single Sign On

The screenshot shows the 'proposalCENTRAL' logo at the top. Below it is the 'APPLICATION LOGIN' section. There are two input fields: 'Username' (with a placeholder 'Username or E-mail') and 'Password' (with a placeholder 'Password'). A 'Forgot Your Password?' link is located below the password field. A blue 'LOGIN' button is positioned below the fields. Below the button is a 'LOGIN using ORCID' button with an ORCID icon and a question mark. At the bottom, there is a red 'Need an account?' link and an orange 'CREATE ONE NOW!' button.

Encourage use of ORCID credentials to login to Journals, Institution systems, and Funder GMS.

Re-Use, Not Re-Enter

The screenshot shows the 'Active and Pending Publications' section. It includes instructions: 'INSTRUCTIONS: Select the appropriate Publications. The drop down below allows you to select the profile that should be accessed for the Publication entries. It will include the PI and any Key Personnel Contact added to this grant.' Below the instructions is a dropdown menu labeled 'Select Publication from:' with 'Jamie Patrick McKee' selected. Underneath is a 'Publications' section with a 'Select All' checkbox. A list of publications is shown, each with a checkbox and a title, such as 'Role of radiation therapy as immune activator in the era of modern immunotherapy for metastatic malignant melanoma.' and 'Abbreviated closure for remote damage control laparotomy in extreme environments: A randomized trial of sutures versus wound clamps comparing terrestrial and weightless conditions.'

In progress reports, select rather than re-type publications and other funding. Encourages content in ORCID.

Push Awards

The screenshot shows a complex interface for managing awards. It includes a navigation bar with tabs like 'Award Details', 'Deliverables', 'Budget', 'Payments', 'Correspondence', 'Notes', 'Contacts', 'Outcomes', and 'Abstract Keywords'. Below the navigation bar is a table with columns for 'Application', 'Award Information', 'Research Subjects - Assistance', 'Funding Development Resources', and 'Event Dates'. The table contains several rows of award data, including 'Award ID', 'Award Amount', 'Award Start - Award End', 'Paid', and 'Spent'. Below the table is a 'Modify Award Status' section with various fields and buttons for managing the award's status and dates.

Push awards to grantee ORCID records to update content automatically.

Thank you.
