

# Approaches and Resources for Optimizing the Mentoring Relationships in Your Program

**A webinar for the Health Research Alliance  
The Research Workforce and Early Career Development  
Working Group”**

Christine Pfund, PhD.

Director, Center for the Improvement of Mentored Experiences in Research (CIMER)

Co-PI, National Research Mentoring Network (NRMN)

Wisconsin Center for Education Research

Institute for Clinical and Translational Research

University of Wisconsin-Madison

 [facebook.com/NRMNet](https://facebook.com/NRMNet)

 [@NRMNet](https://twitter.com/NRMNet)

*The National Research Mentoring Network (NRMN) is supported by the U54 GM119023 (9/2014 – 6/2019), administered by NIGMS.*

# Learning More About You!

- In your role, do you support (directly or indirectly) mentoring relationships for graduate students, post-docs or junior faculty? Yes, no
- Is your program/ organization currently engaged in efforts to optimize mentoring relationships? Yes, no, I do not know
- Which of the following resources does your program/ organization offer?
  - Online resources for mentors
  - Online resources for mentees
  - Mentoring sessions at annual meetings
  - Mentor training workshops (face-to-face or online)
  - Mentee training workshop (face-to-face or online)

# Mentoring is...

A **collaborative learning relationship** that proceeds through purposeful stages over time and has the primary goal of helping mentees acquire the essential competencies needed for success in their chosen career.

It includes using one's own experience to guide another person through an experience that requires **personal and intellectual growth and development**.

Applies to research mentoring, career coaching, peer mentoring, virtual mentoring, and in some cases advising.

# Research Says Mentoring Matters

Strong mentorship has been linked to:

- **Enhanced science identity, sense of belonging, and self-efficacy**  
(Palepu *et al*, 1998; Garman *et al*, 2001; Paglis *et al*, 2006; Lopatto, 2007; Bland *et al*, 2009; Feldman *et al*, 2010; Cho *et al*, 2011; Chemers *et al*, 2011; Thiry and Laursen, 2011)
- **Persistence**  
(Gloria *et al*, 2001; Solorzano, 1993; McGee and Keller, 2007; Sambunjak *et al*, 2010; Williams *et al*, 2015; Bordes-Edgar *et al*, 2011; Campbell and Campbell, 1997)
- **Research productivity**  
(Steiner and Lanphear, 2002, 2007; Wingard *et al*, 2004)
- **Higher career satisfaction**  
(Schapira *et al*, 1992; Beech *et al*, 2013)
- **Enhanced recruitment of URM**s  
(Hathaway *et al*, 2002; Nagda *et al*, 1998)

# Uneven Research, Mentoring Landscape

- White investigators significantly more likely than Black and Hispanic investigators to win R01 awards (Ginther et al. 2011)
- Science faculty rated male applicant as more competent than identical female applicant; offered male ~ \$4,000 more in salary, more career mentoring than to the female (Moss-Racussin et al., 2012)
- URM and White women's mentorship requests more ignored than those by White men (Milkman et al., 2014)
- Male biologists less likely to hire and train women in their laboratories (Sheltzer & Smith, 2014)
- URM typically receive less mentoring than their non-minority peers (Thomas *et al*, 2001; Helm *et al*, 2000; Morzinski *et al*, 2002)
- Minority investigators indicate that inadequate mentoring posed obstacles to obtaining funding (Ginther *et al*, 2011)

# The Committee on Graduate STEM Education for the 21<sup>st</sup> Century

## Key Takeaways: Mentoring

- **Mentoring Matters:** Notably for doctoral students
- **Mentors and Advisors Need Support and Resources:** set expectations, improve mentoring
- **Incentives and Recognition:** incentivize and reward contributions to mentoring and advising
- **Mentors and Advisors, Networks of Support:** Through exposure and opportunities, students should be able to build networks to gain different expertise and support

# National Research Mentoring Network (NRMN)

Provides **biomedical research trainees** with evidence based **mentorship** and **professional development** programming that emphasizes the benefits of **diversity, inclusivity** and **culture** within **mentoring relationships**.

# Focus of NRMN Programming

- Increase access to mentoring across all career stages through **MATCHING & LINKING**

- Improve mentoring relationships and outcomes through **TRAINING** for research mentors, grant writing coaches, career coaches & mentees

- Increase awareness of the value of career mentoring across the nation through **PROMOTING & REFERRING**

- Provide career-enhancing **RESOURCES** and info to broaden knowledge of biomedical careers

# NRMNet: A Platform for Mentoring and Networking

[NRMN Accounts](#) [Home](#) [Profile](#) [Log Out](#)

## NRMN Applications

### MyNRMN

Browse profiles of mentors and mentees from around the country and build your network by connecting with users that share interests with you.

[Take Me There](#)

### Guided Virtual Mentorships

Engage in a one-on-one mentorship involving a weekly discussion over the course of 4 months where you and your partner will receive prompts and suggested discussion topics to guide your interactions each week.

[Take Me There](#)

### MyTraining

Discover and take part in NRMN programs and events. Use your NRMN calendar to apply to participate in upcoming training programs and workshops, register for online webinars, discussion panels, and more.

[Take Me There](#)

# NRMN Participants Across the Country

***Geographic representation of participants registered for NRMNet in the U.S. and U.S. territories, based on collected zip codes, as of 2/28/18.***

# Training through NRMN Mentor Training Core

Through a cadre of Master Facilitators, NRMN serves as a national training hub to improve mentoring relationships.

## Types of Training:

- Research Mentee
- Research Mentor
- Facilitator
- Culturally Aware Mentor

## Modes:

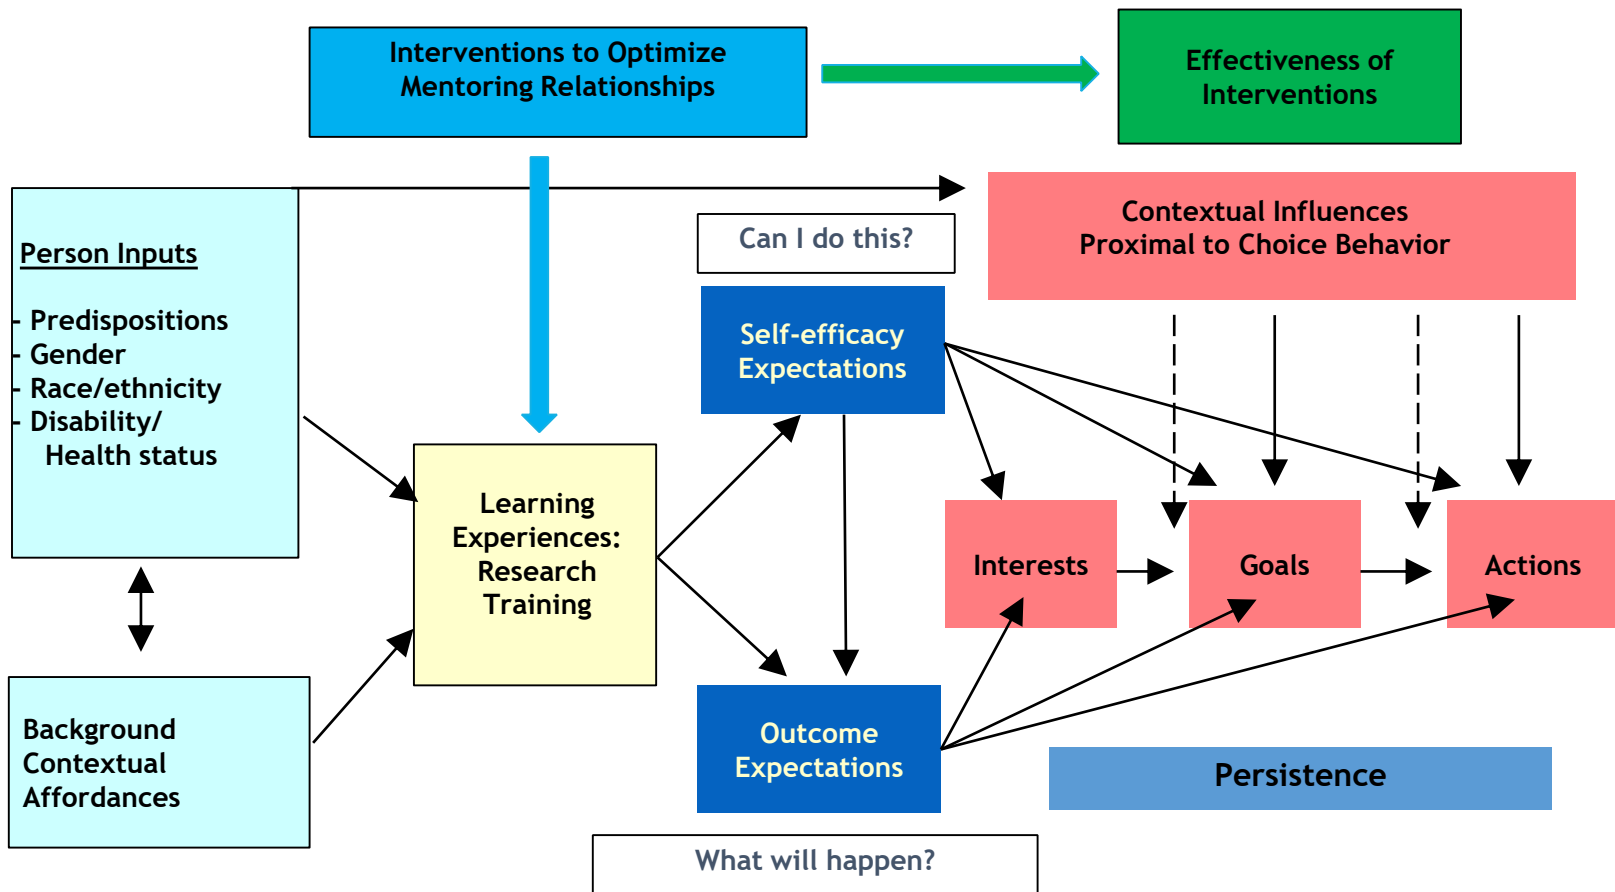

- Face-to-face
- Self-paced online
- Synchronous online

# Theoretical Framework to Study Mentoring: Social Cognitive Career Theory

(Lent, Brown & Hackett, 1994, 2000)

# We developed a mentor training curriculum...

## Key elements of mentor training:

- Process-based using case studies and group problem solving
- Aimed at awareness-raising and reflection
- Provides a confidential and brave forum to share the collective experience of mentors across a range of experiences
- Distribute and adapt resources to improve mentoring

# ...with standardized competencies and a Mentoring Competency Assessment tool...

1. Aligning expectations
2. Promoting professional development
3. Maintaining effective communication
4. Addressing equity and inclusion
5. Assessing understanding
6. Fostering independence
7. Cultivating ethical behavior

# ...we have also developed and tested training for mentees across career stages

## Key elements of mentee training:

- Process-based using case studies and group problem solving
- Introduces students to the culture of research
- Teaches valuable research skills
- Alleviates some of the work of faculty and lab personnel associated with mentoring novice researchers.

# Attributes for Effective Research Mentoring Relationships

<p><b>RESEARCH SKILLS</b></p> <ul style="list-style-type: none"> <li>· Developing disciplinary research skills</li> <li>· Teaching and Learning disciplinary knowledge</li> <li>· Developing technical skills</li> <li>· <b>Accurately assessing mentees' understanding of disciplinary knowledge and skills</b></li> <li>· Valuing and practicing ethical behavior and responsible conduct of research</li> </ul>	<p><b>DIVERSITY/CULTURALLY-FOCUSED SKILLS</b></p> <ul style="list-style-type: none"> <li>· <b>Advancing equity and inclusion</b></li> <li>· Being culturally responsive</li> <li>· Reducing the impact of bias</li> <li>· Reducing the impact of stereotype threat</li> </ul>
<p><b>INTERPERSONAL SKILLS</b></p> <ul style="list-style-type: none"> <li>· <b>Listening actively</b></li> <li>· <b>Aligning mentor and mentee expectations</b></li> <li>· Building trusting relationships/ honesty</li> </ul>	<p><b>SPONSORSHIP SKILLS</b></p> <ul style="list-style-type: none"> <li>· <b>Fostering mentees' independence</b></li> <li>· <b>Promoting professional development</b></li> <li>· <b>Establishing and fostering mentee professional networks</b></li> <li>· Actively advocating on behalf of mentees</li> </ul>
<p><b>PSYCHOSOCIAL SKILLS</b></p> <ul style="list-style-type: none"> <li>· Providing motivation</li> <li>· Developing mentee career self-efficacy</li> <li>· <b>Developing mentee research self-efficacy</b></li> <li>· Developing science identity</li> <li>· Developing a sense of belonging</li> </ul>	<p>Pfund <i>et al.</i> 2016</p>

# NRMN Mentor Training Core

## Accomplishments to Date

- Directly trained 4,604 mentors and 1,553 mentees across the nation
- Directly trained 606 facilitators at 152 institutions
- Developed or adapted training materials for both mentors and mentees with a focus on attributes known to impact persistence

CIMER: Providing resources for organizations and institutions to improve mentoring relationships

Effective mentoring relationships are critical to developing the next generation of researchers. Learn how to improve these relationships and promote a cultural change that values mentoring as a critical aspect of diversifying the scientific workforce.

## Who are we?

Researchers and practitioners dedicated to improving the mentoring relationships among all levels of post-secondary researchers through theoretically-grounded, evidence-based, and culturally-driven training interventions and investigations.

## What do we do?

CIMER faculty and staff investigate approaches for advancing research mentoring relationships, and develop, implement and evaluate mentor and mentee training towards this end.

# [mentoringresources.ictr.wisc.edu](http://mentoringresources.ictr.wisc.edu)

For the mentors of grad students, postdocs,  
and junior faculty

The screenshot shows the homepage of the Research Mentoring website. At the top, it features the University of Wisconsin-Madison logo and the UW Institute for Clinical and Translational Research (UW ICTR) logo. The main heading is "Research Mentoring" with the tagline "Cultivating effective relationships". Below this is a navigation menu with links for Home, Resources, Training, About Us, and Feedback, along with Register and Login buttons. A search bar is also present. The main content area includes an introductory paragraph about the website's purpose and three featured sections: "Mentor & Mentee Resources", "Training Curricula", and "Impact of Training". Each section has a representative image and a brief description. At the bottom, there is a section about the NIH Office of Strategic Coordination's role in leading the Mentor Training Core of the National Research Mentoring Network (NRMN).

Home Resources Training About Us Feedback Register Login

Effective mentoring is a key component to the advancement of the scientific research enterprise. This website is designed to provide resources to improve research mentoring relationships. It provides curricula, assessment tools and resources relevant for mentors and mentees, as well as those who would like to implement mentor training.

**Mentor & Mentee Resources**  
  
Find resources to improve mentoring across each phase of the relationship.

**Training Curricula**  
  
Learn about effective approaches to training mentors and how to use our freely available training materials.

**Impact of Training**  
  
View feedback from participants in our research mentor training program.

**NIH** Office of Strategic Coordination  
The Common Fund

Our UW-Madison team is leading the [Mentor Training Core](#) of the [National Research Mentoring Network](#) (NRMN). NRMN is part of a broader NIH consortium serving mentors and mentees that will strive to enhance diversity in the biomedical research workforce.

# <http://z.umn.edu/OptimizingMentoring>

## “Optimizing the Practice of Mentoring”

Online self-study for mentors of grad students, postdocs, and faculty

The screenshot displays the University of Minnesota website interface. At the top, the University of Minnesota logo and the slogan "Driven to Discover" are visible on the left, while "myU" and "One Stop" links are on the right. A search bar is located in the top right corner. Below the header, the "Clinical and Translational Science Institute" logo and tagline "Helping researchers be more successful" are prominent. A navigation menu includes "Home", "About", "Consultations and services", "Researcher resources", "Education and training" (highlighted in yellow), "Community members", and "News and events".

The main content area is titled "Mentor training" and includes a breadcrumb trail: "Home > Education and training > Mentoring". The primary heading is "Optimizing the Practice of Mentoring: An Online Curriculum for the Professional Development of Research Mentors". Below this, a paragraph states: "The Clinical and Translational Science Institute has developed a free, self-paced, online, professional development course designed to prepare faculty from a range of disciplines to be effective research mentors for junior faculty, post-doctoral fellows, and graduate students."

Two call-to-action buttons are present: "Register" with the text "Registration takes 5 minutes and will provide you with immediate access to the course." and "Log in" with the text "Already registered? Log in to reaccess the course at any time."

A left-hand sidebar menu lists various resources: "Career development programs", "Online training courses", "Mentoring" (with "Mentor training" highlighted), "Become a mentor", "Mentor of the Year Award", "Seminars", "Degree programs", and "Clinical research professionals".

# CAM Training Curriculum

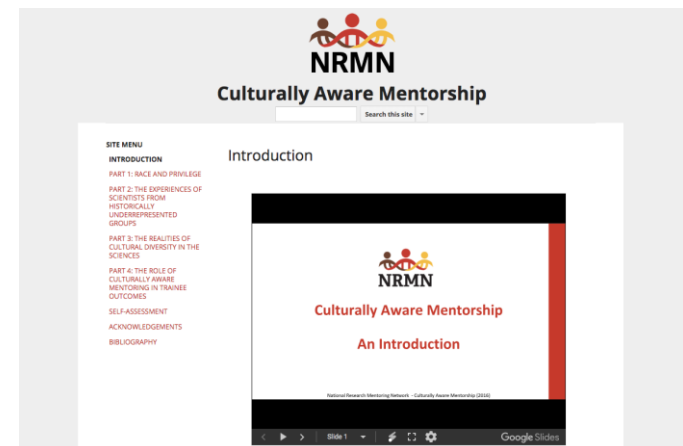

A 7hr intensive training designed for mentors across all career stages who have already completed some form of mentor training.

During the workshop, mentors learn how to:

- Identify how their cultural beliefs, worldviews, and identities influence their mentoring practices.
- Recognize how cultural diversity can impact their research mentoring relationships.
- Acknowledge the impact of conscious and unconscious assumptions, privilege, stereotype threat, and biases in the mentor-mentee relationship.
- Use culturally responsive mentoring principles to guide them in talking about cultural diversity matters with their mentees.
- Apply evidence-based strategies to reduce and counteract the impact of biases, stereotype threat, and privilege to foster trusting, culturally responsive mentoring relationships.

## CAM Online Module

A ~1hr, self-directed session that reviews key cultural diversity terms and research on the relevance of race, ethnicity, and other dimensions of cultural diversity to research training in the biomedical, behavioral, and clinical sciences.

# Example Implementations

- Require program mentors to engage in some form of mentor training
  - 90 min online module +/- discussion
  - 8 hours of face-to-face training in one day or spread out over time
  - Training spread out over a full year (e.g. HHMI Gilliam Program)

# HHMI Gilliam Graduate Student Fellowship and the BWF Postdoctoral Diversity Enrichment Programs

## A Strategic Collaboration

- Support the development of a diverse scientific workforce
- Recruit and support highly competitive scholars
- Engage fellows in multiple years of research training and professional development activities, guided by mentors
- Optimize the mentoring relationships and training environments of the scholars

# One Year Program for Mentors (25-30 hours)

Program elements built from tested interventions supported by HHMI, NIH (NRMN and NIGMS R01) and NSF

# Example Implementations

- Require/ encourage program mentors to engage in some form of mentor training
  - 90 min online module +/- discussion
  - 8 hours of face-to-face training in one day or across time
  - Training spread out over a full year (e.g. HHMI Gilliam Program)
- Require/ encourage trainees to engage in some form of mentee training/ “mentoring up”
  - Online webinars
  - Workshop or series of face-to-face sessions
  - Post online resources to read

# Example Implementations (continued)

- Have someone from your organization attend a facilitator training so they can implement mentor or mentee training at your annual meeting
  - CIMER offers regular facilitator training events

# Acknowledgements

Center for Women's  
Health Research

Questions?

# Research Mentor Training Funding

- Original *Entering Mentoring* curriculum (HHMI Professors Program, PI: Handelsman)
- Adapted for use across science, technology, engineering, math, and social sciences (NSF #0717731, PI: Pfund) and clinical and translational science (CTSA) award mentors (NIH/NCRR ARRA UL1RR025011, PI: Drezner)
- Workshops and curricula have been developed for faculty mentors (NSF #0717731, PI: Pfund) including training workshops for T32 and R25 trainer
- NIH has funded a study to develop better understanding of specific factors in mentoring relationships that account for positive student outcomes (NIH #1R01GM094573-0 PI: Byars-Winston, co-I: Pfund) and renewal to focus on cultural aspects of mentoring relationships (PIs: Byars-Winston and Pfund)
- The curriculum has been adapted for use in a synchronous, online venue through the NSF-funded Center for the Integration of Research, Teaching and Learning (CIRTL) Network (NSF DUE-0717768, PI: Mathieu)
- CIRTL and APS partnered to adapt the curriculum for physic mentors.
- NIH has funded legacy website (3UL1RR025011-05S1, PI: Drezner), randomized controlled trial (3UL1RR025011-03S1, PI: Drezner) and train-the-trainer workshops (R13GM106445, Co-PIs: Pfund and Sorkness)
- *Optimizing the Practice of Mentoring* online module developed at the University of Minnesota's NIH-funded Clinical and Translational Science Institute (UL1TR000114)
- NIH has funded National Research Mentoring Network (NRMN) (U54 MD0009479-01)
